SUMMARY OF QUALIFICATIONS

Backend-focused Full Stack Developer with practical experience building secure RESTful APIs using ASP.NET Core, Node.js, and Express.js, and contributing to production ERP systems. Skilled in relational database design, authentication and authorization, and deploying applications to AWS. Experienced in building scalable frontend applications with React.js and committed to writing clean, maintainable code while continuously learning new technologies.

SKILLS

- **Programming Languages:** C#, Python, Java, SQL, Javascript, HTML, CSS.
- **Backend:** ASP.NET Core, Node.js, Express.js, Restful API's, LINQ.
- **Frontend:** React.js, React Router, Bootstrap.
- **Database:** PostgreSQL, MySQL, Microsoft SQL Server.
- **DevOps & Cloud:** Linux, AWS, Git/GitHub.
- **Languages:** Arabic, English.

EXPERIENCE

- **TechX - Backend & Distributed Systems Remote Internship** [completion certificate](#) 2/2026 - 4/2026
 - Worked on backend and distributed systems project that is built on Node.js and Next.Js Frameworks.
 - Used Amazon Web Services (AWS) to deploy the project.
 - Contributed to AI-Archives, a Chrome extension that archives AI chats with user consent.
 - Developed **web scraping** tools to collect and process AI conversation data.
- **Software Engineer Intern - Obsidian Labs** 4/2026 - 6/2026
 - Contributed to Polaris (ERP System), with CRM, inventory, and accounting modules, working with Sanic and React stack.
 - Onboarded into a complex codebase within the first week, identifying and resolving issues in both frontend and backend
 - Built high-performance asynchronous APIs in Python, while improving database interactions for reliability and efficiency.
 - Debugged and fixed cross-layer bugs, enhancing system stability and overall user experience.

Projects

- **BANKIT - ASP.NET Core/React.js - [Github Repository Link](#)** 3/2026
 - Developed a full-stack banking system using ASP.NET Core and React.js, with different roles Admin, Employee, Customer.
 - Implemented JWT Authentication and ASP.NET Identity and transaction tracking for Deposits, Withdrawals, Transfers, and Loans.
 - Built a **responsive React.js** frontend for account management, transactions, loan requests, balances, and user interactions, integrated with the backend RESTful API.
 - Applied Repository Pattern and optimistic **concurrency** control using **RowVersion** to maintain data integrity.
 - Implemented controller logging using Serilog and integrated the system with Microsoft SQL Server.
- **COURSE ACADEMY API - ASP.NET Core - [Github Repository Link](#)** 2/2026
 - Developed a **role-based system** supporting multiple user types with **JWT & Identity** authentication and verification.
 - Architected the project using **Repository Pattern**, leveraging abstraction layers and DTOs for maintainability
 - Built data handling, including **search, filtering, and pagination**, to enhance performance and user experience.
- **KEEPER APP | React - Node.js- Express.js - [Github Repository Link](#)** 7/2026
 - Developed a full-stack note-taking application with user authentication using Passport.js, session-based authentication, and cookies. Built a RESTful backend with **Express.js** and **PostgreSQL** to securely store user accounts and personal notes. Implemented features for user registration, login, and creating and deleting notes, ensuring each user can access only their own data. Built a modern UI that consumes the backend using **React.js**.

EDUCATION

Bachelor of Computer Engineering

10/2022 - 05/2027 (Expected) | Amman, Jordan

University of Jordan

Current GPA: 3.53/4

CERTIFICATES

- [The Complete Full-Stack Web Development Bootcamp](#) Udemy 22/7/2026
- [Full Stack Development BootCamp \(160hrs\) \(ASP.NET CORE\) and Flutter](#) CODERZ Company 11/2025
